LinkedIn GitHub Portfolio

Objective

Motivated Computer Science graduate with a strong foundation in Software Development, Artificial Intelligence, and Data Science. Proficient in C++, JavaScript, and Python, with a passion for leveraging emerging technologies to solve real-world problems. Skilled in building scalable applications, analyzing data, and developing AI-driven solutions. Eager to contribute to innovative projects in software engineering and artificial intelligence while continuously enhancing technical expertise and professional growth.

Education

National University of Computer and Emerging Sciences

Bachelors in Computer Science

CGPA: 3.38/4

Karachi, Pakistan

August 2022 – June 2026

Relevant Coursework: Programming Fundamentals, Object-Oriented Programming, Data Structures, Operating Systems, Software Engineering, Artificial Intelligence, Data Science, Database management system, Deep Learning, Agile Software Project Management, Computer Networks, Information Security, Recommender Systems.

Honors and Awards:

- Dean's/Rector's List holder at FAST-NUCES. **[Fall 2024, Spring 2025, Fall 2025, Spring 2026]**
- Secured 97.7 percentile in the HEC-P@SHA National Skill Competency Test.

Pakistan International School

Pre Engineering

Grade: A-1 [Matriculation: 87%, Intermediate: 84%]

Jeddah, Saudi Arabia

August 2008 – June 2022

Honors and Awards: Overall first position in Intermediate.

Skills Summary

Programming Languages: C/C++, JavaScript, Python, Sql.

Frameworks: React JS, Angular, Node JS, Next JS, Pandas, FastAPI, Bootstrap, Material UI.

Core Skills: Data Structures, Object Oriented Programming, Data Science, Database, Agentic AI, ML, RAG.

Tools: Jupyter Notebook, Google Colab, Papyrus, Oracle, MS Office, VS Code, Supabase, Git, GCP, Vercel, Docker.

Soft Skills: Team Work, Management, Problem Solving, Communication.

Work Experience

Software Developer — Vison71 Technologies

July 2025 – Present

- Developing tailored business softwares, web dashboards, using Next.js, MERN Stack, and Capacitor.
- Contributing across the SDLC through feature development, testing, optimization, and cross-team collaboration.
- Conducting product and technical research to evaluate software solutions, workflows, and emerging technologies.

Teaching Assistant — FAST-NUCES

August 2024 – June 2026

Assisted Courses: Computer Architecture, Probability & Statistics, Database, Parallel & Distributed Computing.

- Assisting in delivering lectures and explaining complex concepts to students.
- Grading assignments, quizzes and projects to ensure student learning.
- Providing one-on-one support to students struggling with architectural concepts.

Projects

Eneryltics — Final Year Project [\[LINK\]](#)

- Developed an AI-driven electricity forecasting and recommendation system for K-Electric consumers using ensemble deep learning models TFT + Bi-LSTM.
- Built a full-stack web application using Next.js, FAST API and Supabase, including an asynchronous billing-data scraping pipeline, usage forecasting engine, slab-aware recommendation system, and interactive consumer dashboard.

AgriCure — Pesticides Recommendation System [\[LINK\]](#)

- Developed a ResNet50-based disease classifier for image-based disease prediction and recommendation workflows.
- Integrated LangChain and MCP to build an Agentic AI workflow, exposing classification and coordinator capabilities.

EZ Travel [\[LINK\]](#)

- Built a Red Bus route optimizer using FastAPI and React, using A* search to find the shortest and cheapest routes
- Computed stop distances using OpenStreetMap data and Haversine formula with a clean, responsive UI.

Employee Attrition Prediction System [\[LINK\]](#)

- Built an AI-powered Employee Attrition Prediction system using XGBoost, integrated with FastAPI and React.js
- Designed an end-to-end ML pipeline for real-time attrition insights from monthly/quarterly employee surveys.
